- **Durable and Beautiful**
- **Soap & Water Clean Up**
- **No Risk of Spontaneous Combustion**
- **Easy To Use**
- **Optimum Grain Enhancement**
- **Quick Drying for Fast Turnaround**

THE SYSTEM

STAIN BASE & PRE-CONDITIONER

Stain Base and Pre-Conditioner does double duty! Used as the base for the Wood Iron Colorants, Stain Base gives you control over stain colors on the job site. Mixed fifty-fifty with water it becomes Pre-Conditioner. Applied before staining, Pre-Conditioner helps soft woods build a finish to more depth and helps prevent blotchiness. It is always recommended when staining soft woods. Do not use on oak. Covers 500 square feet per gallon.

GENERATIONS WATER-BASED STAIN

Generations is a unique blend of UV stable ingredients. It works as a clear stain base for interior or exterior stain. Generations provides excellent adhesion, flow and durability. Generations has a higher viscosity than Stain Base and is preferred by some applicators over Stain Base. Generations can be used on exterior wood decks and siding. Stain base is interior use only. Coverage is 400 sq. ft. per gallon per coat. Generations can be used with no tint without sacrificing UV protection.

COLORANT CONCENTRATES

Colorant Concentrates give you the freedom to economically create custom stain colors on site. Colorant Concentrates can be blended in Stain Base or Generations to rapidly true color representation. You can mix the quantity of stain you need for a particular project. Colorant Concentrates are durable enough for interior or exterior use when finished with Top Coat or Doors and More finishes.

The Solutions For Wood!

TOP COAT

Top Coat is an interior and exterior wood finish. It can be used to seal and finish stained woodwork. Top Coat comes in semi-gloss and satin sheen. Top Coat is very fast drying and low odor. Top Coat can be brushed, sprayed or rolled. Two coats are recommended for all interior and exterior windows, doors and trim. Covers 400 square feet per gallon.

EXTENDER

Extender is an additive that extends the drying time of the Stain and Top Coat to give the applicator more brushing time.

DOORS & MORE URETHANE FINISH

A water-based urethane, one-component, fast drying sealer and finish designed to provide maximum durability and UV protection for all types of wood doors, trim, cabinets and other interior wood. Its fast drying time allows up to four coats to be applied in one day. It comes in Satin or Semi-Gloss sheens. Covers 400 square feet per gallon.

SO THERE YOU HAVE IT—THE NEXT GENERATION OF WOOD STAINS AND FINISHES!

Wood Iron Stains and Finishes are crafted products that are preferred by professional finishers for doors, windows, trim, tongue and groove ceilings, furniture, cabinets, and log home interiors. All Wood Iron Mobile Match products are exceptionally clean, durable and environmentally responsible products.

STANDARD COLORANT COLORS

Light Colors on Oak	Dark Colors on Oak	Light Colors on Pine	Dark Colors on Pine
